

Nursing School

With a vision of educating and empowering women towards self-sufficiency, the organisation established the RDT Nursing School in 2004, with a 3-year nursing program. With a primary objective of training compassionate nurses who prioritise patient care with empathy and dedication.

Upon completion, some graduating students are employed by RDT in its hospitals to bolster the nursing workforce and address attrition rates. This initiative not only provides hands-on experience and exposure at the hospitals for the nurses but also guarantees job placements. RDT also extends scholarships and fee concessions to a percentage of students from SC/ST/OBC/OC categories.
